A fast AFC mode can be used to track doppler shifting BPSK signals up to +/-20Hz/Sec.

1 5Mirror version 2 1 0Setup\_RXSSTV exe (mirror André PE1PQX)Back To SoftwareExamples of received ISS SSTV images in Robot36 using RX-SSTV (16.. Signal strength/quality value available for squelch and display DSP settings!Soundcard clock error measuring and compensating capability.. Uses the powerful MMSSTV Engine © JE3HHT - Makoto Mori! Because SWL's don't need TX, this part of the program can be left out.. However, the program will detect any available SSTV-mode that it receives and activate the automated saving process.. This mode is known as Digital SSTV EP Cam - EP Cam can be used in place of ManyCam to capture the upper left corner of EasyPal.

No cumbersome TX com-port settings, just connect your soundcard to your receiver, tune to a SSTV frequency and your set! Multiple soundcard support.. ) Easy to use! Double sized image view option Recognizes 37 different types of SSTV formats Works in all Windows versions! Hardware/software: Works on any Windows based PC or Linux using the Wine emulator Minimum requirements: 200MHz Pentium (those were the days.. Adjustable DSP and Spectrum settings You can copy/save/edit the received SSTV images Unlimited history storage.. ;- ) Soundcard A SW SSB receiver and/or FM VHF receiver, radio Best of all: It's FREEWARE! DOWNLOAD RX-SSTV v2.. or Also ideal for receiving SSTV from the International Space Station ISS! Is why by default Robot-36 mode is used in the program.. Still, why no TX? Why? Primary because there are so many, many SSTV programs out there that do a great job receiving and transmitting SSTV, but none for the SWL (short wave listener) or for people that have no HAM license, tech-students in schools etc.. No cumbersome settings for com-ports, ptt interfaces and no accidental transmissions by activating the TX by mistake! A totally harmless program for even the youngest of SWL's who want to discover the world of digital communications, like SSTV.. No special RX or TX interfaces: uses your Soundcard! BMP and JPG with adjustable compression/quality Time stamp Embed and log FSK-ID Save last received image (ideal for FTP, websites. b0d43de27c [Navteq 2012 q2 google](#)
